

What is the purpose of this update?

This document tells you how the High Growth investment option has performed and what fees were charged. The document will help you to compare the fund with other funds. PSS Trustees Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

High Growth has a 95:5 split between Australasian and international shares and New Zealand cash. It is expected to provide a long-term return after tax and investment expenses of 4.5% p.a. above the inflation rate, with the likelihood of a negative return approximately 1 year in every 3 and a small probability (approximately 1 year in 20) of any annual loss exceeding 15%.

Total value of the fund	\$24,996,037
Number of investors in the fund	349
The date the fund started	18 November 2021

What are the risks of investing?

Risk indicator for High Growth

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.policessuper.co.nz. Look for the risk profiler under 'forms and resources'.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years.¹ While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) available at www.policessuper.co.nz and on the offer register at www.disclose-register.companiesoffice.govt.nz for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	N/A ²
Annual return (after deductions for charges but before tax)	N/A ²
Market index annual return (reflects no deduction for charges and tax)	-4.65%

The market index annual return is based on the returns of a composite index. The composite index is made up of the individual asset class benchmark indices used to measure the performance of each underlying fund/asset class into which the fund invests. Accordingly, the market index annual return for each of the funds is a composite return, calculated using the weighted average return of the benchmark indices used to measure the performance of the underlying funds/assets into which each fund invests. The weighting for each benchmark within the composite is equal to the strategic asset allocation weighting for that asset class. This market index return provides a relative measure of the fund's performance.

Further information about the market index is available on the offer register at www.disclose-register.companiesoffice.govt.nz.

What fees are investors charged?

Investors in High Growth are charged fund charges. In the year to 31 March 2022, these were as follows:

	% of net asset value
Total fund charges	0.61
Which are made up of:	
Total management and administration charges	0.61
Including:	
Manager's basic fee	0.53
Other management and administration charges	0.08
Other charges	Dollar amount per investor
Administration fee	\$66 per annum

Small differences in fees and charges can have a big impact on your investment over the long term.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Police Superannuation Scheme PDS for more information about these fees.

Example of how this applies to an investor

Mary had \$10,000 in the fund on 18 November 2021 and did not make any further contributions. At the end of the year, Mary incurred a loss after fund charges* were deducted of \$594 (that is -5.94% of her initial \$10,000). Mary also paid \$66 in other charges. This gives Mary a total loss after tax of \$753 for the year.

* but before tax

What does the fund invest in?

Actual investment mix³

This shows the types of assets that the fund invests in.

Asset type	Allocation
Cash and cash equivalents	5.43%
Australasian equities	25.43%
International equities	69.14%

Target investment mix

This shows the mix of assets the fund generally intends to invest in.

Asset type	Allocation
Cash and cash equivalents	5.00%
Australasian equities	25.00%
International equities	70.00%

Top 10 investments³

Asset name	% of fund net assets	Type	Country	Credit rating
Fisher & Paykel Healthcare Corporation Limited	2.48%	Australasian equities	New Zealand	N/A
BNP Paribas US Dollar Account	1.97%	International equities	United States	N/A
Mainfreight Limited	1.84%	Australasian equities	New Zealand	N/A
Auckland International Airport Limited	1.61%	Australasian equities	New Zealand	N/A
Microsoft Corporation	1.56%	International equities	United States	N/A
EBOS Group Limited	1.55%	Australasian equities	New Zealand	N/A
Contact Energy Limited	1.48%	Australasian equities	New Zealand	N/A
Spark New Zealand Limited	1.44%	Australasian equities	New Zealand	N/A
SSgA Passive FX overlay (Hedged Composite Global Shares Portfolio)	1.43%	International equities	New Zealand	N/A
Meridian Energy Limited	1.23%	Australasian equities	New Zealand	N/A

The total value of the above 10 individual assets is 16.59% of the net asset value of the fund.

Currency hedging

Hedging is a tool used to reduce the effects of changes in exchange rates on investment returns. Investments that are hedged are, in effect, made in local currency. The scheme's investments in international equities are 50% hedged. Further details and additional information are available in the statement of investment policy and objectives at www.policessuper.co.nz and on the scheme register at www.disclose-register.companiesoffice.govt.nz.

Key personnel

Notes

- ¹ Because the fund has not been in existence for 5 years, the risk indicator is based on a combination of actual returns and benchmark returns. The risk indicator is based on actual returns data since the fund was introduced on 18 November 2021 and, before that, benchmark returns based on the strategic asset allocation for the fund. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
- ² Past year returns are not applicable because the fund has been in existence for less than a year.
- ³ For the reporting of the types of assets under 'Actual investment mix' and 'Top 10 investments', cash retained for liquidity management at a sector level is assigned to the asset class to which it relates.
- ⁴ This includes service as an individual trustee of the scheme before the shift to a corporate trustee.
